Day 7 - Live Deployment & Post-Launch Practices

Production Deployment:

- Secured **environment variables** & encrypted sensitive data □
- Deployed on **Vercel** with HTTPS enabled
- Managed **codebase security** with private repositories & separate staging/production

Disaster Recovery Plan:

- Set up **regular backups** & multi-location storage
- Created & tested a **DR plan** for quick recovery

Monitoring & Maintenance:

- Used **Google Analytics, Sentry, and Pingdom** for tracking
- Optimized performance & logged issues for continuous improvement
- Scheduled **maintenance updates** with advance notifications
